

Quality Policy for TMS Electronics

At TMS Electronics, quality is our foremost commitment. We are a qualified and competent logistics partner for electronic components, dedicated to delivering the highest possible safety and quality at every step. Our policy is to meet and exceed the expectations of customers and stakeholders through carefully designed quality processes, continuous improvement, and a strong culture of responsibility.

Customer Focus and Delivery Reliability

Our customers are at the heart of everything we do. We strive to provide exceptional service, reliable deliveries, and full traceability.

Continuous Improvement and Quality Assurance

Quality, safety, and efforts to prevent counterfeiting are integrated into our daily processes. By actively evaluating and improving our practices, we work to consistently meet and exceed all applicable requirements. Our quality team is committed to strengthening our processes to meet future challenges.

Engaging and Safe Work Environment

We care about the well-being of our employees and work to create a safe, respectful, and growth-oriented workplace. With a dedicated team sharing our focus on quality, we build a strong quality culture and a solid foundation for future success.

Environmental Policy for TMS Electronics

TMS Electronics takes its environmental responsibility very seriously and works toward a sustainable future. Our goal is to minimize our environmental impact and contribute to a cleaner world.

Focus on Sustainability

We integrate sustainable solutions into everything we do and strive to offer products that help our customers achieve their environmental goals.

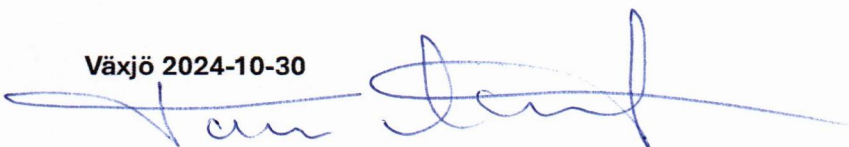

Prevention of Pollution

We actively work to reduce environmental impact in all areas of our operations through smart resource use and efficient processes.

Continuous Environmental Improvement

Our environmental work is characterized by continuous improvements and compliance with applicable requirements. We are committed to reducing our impact on the environment and making a positive difference for the future.
